

MATTE ADDITIVE

Matte Additive for Solvent-based Sealers

DESCRIPTION

MATTE ADDITIVE is a non-hazardous additive that will convert a high gloss, solvent-based acrylic sealer to a matte finish sealer. The material has a low density, allowing it to remain suspended in low-viscosity systems.

FEATURES

- ★ Matting finish
- ★ For solvent-based sealers
- ★ Convenient
- ★ Reduce inventory

MIXING

Add two 8 oz scoops of uncompacted MATTE ADDITIVE to 1 gallon of clear concrete sealer or one full container per 5 gallons of sealer. Mix well and continue to mix every 15 minutes to avoid settling. Wear dust mask and eye protection.

APPLICATION

The MATTE ADDITIVE should be applied into second coat on more porous surfaces such as pavers. Roll the sealer onto the surface and immediately backroll to ensure even application.

CLEANUP

Cleanup with any solvent suitable for the sealer being used.
